A Practical Illustration of the

FOUR CANNONS TO BE FIRED AT

One in San Francisco, One in St. the World-Some Great Achieve-

NEW YORK, May 3.-Tomorrow night Governor Morton will open the national exposition of lectrical appliances in the industrial arts building in this city. Elaborate preparations have been made for this event, and it is expected that the attendance will be large and include some of the most distinguished electricians in this country.

The convention is that of the National Electric Light association. to plunts in the United States, whose aggregate capital is in excess of \$750,-000,000. The industrial arts building has been the scene of great activity during the last ten days and night, and an enormous force of electricians and mechanics have been at work.

THE PRINCIPAL FEATURE of the opening exercises will be the turning on of a current of electricity generated by the waters of the Niagara river, in the great power house of the Niagara Power company, which current of electricity will be transmitted over an ordinary telegraph wire of the Western Union Telegraph company. The insulation of this line is such that no considerable amount of electrical energy for power purposes can be transmitted, but by the use of the recently in ented two-phase Tesla sys-tem, enough energy will be transmit-ed to establish beyond question, it is claimed, the feasibility of long distance claimed, the feasibility of long distance electric power transmission upon a commercial basis. This line will be 462 miles in length, the longest line here-tofore established from the falls. The governor will use upon this occasion the gold key with which President Cleveland put in motion the

WHEELS OF INDUSTRY "

at the World's fair. Governor Morton at the World's fair. Governor Morton will also, at the declaration that the exposition is open, discharge four pieces of artillery, one stationed in the public square in San Francisco, one in Augusta, Maine, one in front of the public building at St. Paul and another in the public park in New Orleans. This discharge is also to be accomulished by a current of electricity complished by a current of electricity generated in Niagara and transmitted over the telegraph lines of the Postal Telegraph-Cable company. & is also with the sanction of the secretary of war, the government artillery service will be brought into requisition.

The current of electricity which is transmitted from Niagara will be used in putting in motion a model of THE NIAGARA POWER PLANT.

THE NIAGARA POWER PLANT, recently constructed by a syndicate at a cost of upwards of \$5,000,000. This plant consists in a tunnel, \$,000 feet in length, entered by a wheel pit 186 feet in depth, at the bottom of which are mammoth turbine wheels operating a shaft, or top of which are immense electrical generators, with a capacity of 5,000 horse power. The total weight of the turbine wheel, shaft and generators is upwards of 100 tons. This model, which is shown with the Niagara current, is a cross section view of the turbine, wheel pit and machinery, and also shows a section of the city of Niagara Tajis, with the course of the river and American falls, the island and Camadian frontier.

Taylor of thi interest will be the closing of a circuit around the world, by which a cable there he knew Melron. message will be sent by Chauncey Depew over the cables to Lisbon, through a graduate of a normal school in Kanthe Mediterranean and the Suez canal and the Red sea, to Aden, thence to Ceylon and Australia, returning by Ceylon and Australia, returning by way of Cape Good Hope, the African coast, the Bradil cable, the land line to the City of Mexico, thence by way of San Francisco to New York. This message Dr. Depew will send from a table which will be placed in a gallery of the exposition building. It will be addressed and received by Mr. Edward D. Adams, president of the Niagara Power company, whose reply will transmitted to and received by D: new, who will follow with a brief address upon the electric era.

As a Test.

NEW YORK, May 3.-The suilen roar of the great falls of Niagara was heard in this city tonight when the heard in this city tonight when the electric current which is to connect the thunder of the falling water with the electric show at Grand Central palace was turned on for the first time as a test. The test was made by the managers of the show and was pronounced a success. The sound of the matters could be plainly heard. At the same time the power was not on and same time, the power was put on and every bit of machinery of the electrical show was put in motion for a few

## RAINES LIQUOR LAW.

How It Was Enforced in New York Yesterday.

NEW YORK, May 3.—There appeared little change in the situation in the today, the first Sunday under the state board. The saloons throughout the city were closed, such business as was being done in the direction of selling liquor being monopolized by those places which hold hotel liceness. The olice contented themselves with find-ng out all places of the "hotel" class which ventured to sell liquor without neals and unearthing back and upstairs rooms in which beer was being sold in violation of the law by owners of saloons in the same building.

Loa, 9.000 feet above Kilauea and over 13,000 above the sea level, became suddenly active on the morning of the 23rd inst. This is the first disturbance in EXPOSITION Makuaweewso since 1886. These manifestations in the past have been the most destructive of any on the big island. From all of them lava flows

Practical Illustration of the World's Progress.

The first of great importance of which there is any record, occurred in 1845. In 1855 there was a tremenduous lava flow that came within six miles of Hilo. There were other flows in 1856, '59, '80 and '85. The one of 1880-81 lasted nine months, an unusual length of time and came within half a mile of the Hilo town, ceasing after all bad prepared to move.

This government has decided not to afflow any more than 700 immigrants to be landed at the port of Honolulu or any other port in the Hawalian islands at any one time.

## GREAT OBSERVATORY.

It Will be Built After the Style of Pullman.

CHICAGO, May 2 .- Sixty thousand dollars has been expended on the con-struction and equipment of a great ob-servatory and a number of years of the yaluable time of two noted astrono-mers and their assistants will be de-voted to what is expected to prove the most important astronomical expedition of the century. Percival Lowell of Boston has built the observatory and great telescope and will be one of the States embassy assembled in the Raise States embassy assembled in the Ra two principal scientific workers on the expedition. Dr. T. J. See of the University of Chicago will be the other.

States embassy assembled in the Raiserhof at Mr. Uhi's temporary home at 2:30 o'clock. At 3 o'clock Baron Usedom, court o'clock. Both are scientists of renown. Their operations will begin in July from the treduce diplomats to the sovereign, called movable observatory to be erected on with three gorgeous court equipages. In the lofty Mexican plateau near the City of Mexico, and will probably be continued in 1838 somewhere down in Peru. The objects of the expedition are twofold. Mr. Lowell will studyy

New Ambassador Will Redound to Items of Interest Concerning Affairs Abroad.

ST. PETERSBURG, May 3.—Lieutenant Romeiko has been appointed special attache to the United States mission here for the coronation of the BERLIN, May 2.-Today was set for the czar.

ROME, May 3.—The Opione denies positively a story that negotiations are pending for the cession of Cassala to bassador. The audience was given today in a driving rain storm, but the ceremony Great Britain.

The entire personnel of the United States embassy assembled in the kaiserhof LONDON, May 3.—The Persian min-ister at London, Mirza Mohammed All Khan, has received a telegram from the new shah confirming his appointo'clock. At 3 o'clock Baron Usedom, court the

> BUDA-PEST, May 3.—The cere-monies attendant upon the millennial belebration were continued today. The emperor and empress, the members of the court, diplomatic corps and a large number of aristocratic personages at-tended a solemn thanksgiving service in the Mathias cathedral. The city is brilliantly illuminated tonight in cele-bration of the fete.

fore Mr. Uhl's arrival. In the second carriage rode Mr. Uhl and Baron Usedom, preceded by two outriders bearing the white and red Brandenburg keys, their uniforms being trimmed with heavy silver embroidery. All of these wore elaborate uniforms and numerous tackeys were in attendance. The horses were gatly caparisoned. The third carriage was occupied by the suite of the embassy, including Mr. H. G. Squires, the second secretaryof the embassy, and Lieutenant R. K. Evans, the military attache, the latter clad in handsome regimentals. While driving up Under den Linten the military guards marched up to the carriages and presented arms to the roll of drums. There were large crowds in the street to witness the pageant.

Arrived at the Schloss, Baron Usedom ushered Mr. Uhl into the white saion. Only Baron Marschal Von Bieberstein, the imperial minister of foreign affairs, was present, besides the emperor and Mr. Uhl. At the conclusion of PARIS, May 3,—The French municipal election today passed off quietly. The new Paris council will be almost identical with the last one. The returns from the provinces are still incomplete. There were slight disturbances, accompanied by the burning of ballot boxes, at Resieres.

PARIS, May 3.—There was a splendid and large attendance for the Long Champs racing today. The favorites, Rothschilds Majestuse and Schlicker's La Basilic, were defeated in the 1,000 and 2,000 guinea races. The former race resulted in Riposte winning, Roheme second and Palerse third. In the latter race Arreau won, La Basilic second and Eldorado third.

the subject of the remarks which had been made on either side.

The Associated Press, however, learned elsewhere that Mr. Uhi's speech, which had been prepared in advance, and the copy submitted to the court officers, according to the custom and requirements, pointed out to the emparor the important and close relations existing between the two countries, both in commerce and science. Many of the best citizens of the United States, he said, were of German birth or German descent. He expressed the hope that these ties would strengthen and not disturb the peaceful and friendly relations of the two countries, and concluded with an expression of his admiration of the country to which he was accredited and for its ruler.

more intimate relations between the two countries.

The emperor and empress and Prince Ferdinand of Bulgaria attended the opening of the art exhibition today.

Count Von Kanitz, the Agrarian leader, has given notice that he will introduce a resolution in the reichstag which will be supported by the Conservatives, inviting the chancellor to communicate with other countries with a view to the common prohibition of speculative time bargains in corn, etc.

white outlaws named Dixon and Grobberra custains in the Matabeles in their operations.

King Khama (the friendly chief) believes that the Matabeles are likely to retire to the Zambesi before the arrival of the relief column at Buluwayo.

King Khama complains that his people are ruined by famine and by the death of their cattle. This is true and on this account the authorities ought to prepare measures of rellef. THEY HAD KNOWING HENS.

How a Proud and Sensitive Fowl Asserted Her Dignity.

He was being interviewed on the poultry business, when he said: "I don't want to boast, but I do think we have got the knowingest hens in the world in our end of town, I have a flock of 200, all black. It is a theory of mine that black hens lay better than those of any other color. One day I of mine that black hens lay better than those of any other color. One day I found a hen in my flock with a few white feathers in her twil. I called the hired man and told him to catch and kill her. 'You can't rely on the laying capabilities of a hen with white feathers.' I said. The hen gave me a sorrowful look, but did not say a word. Next morning the hired man told me that he could not find her. A month or two later I opened a pile of potatoes I had stored in the cellar and found a hig, holow space in the center of them. I had stored in the center of them, big, hollow space in the center of them. There was a bunch of black feathers in the place with three white ones stand-ing up in a defiant sort of a way. Be-hind the feathers were sixty-six eggs. recognized at once that it work of the missing hen. The proud, sensitive creature had stowed herself away and worn herself out laying eggs to prove that the theory was a mis-

## Gardening Time

The first copper cent was coined in large stock of GARDEN TOOLS of The first steam engine in America all kinds, at prices away below any came from England in 1753. other house in this city. How about Glass windows were first used in hose at 6½ per foot, and from that up. Come in and see us. Will always
